

## **Direct Access to W&L Address Book From a Mac**

Author: Michael Smitka

Date: August 17<sup>th</sup> , 2004

Using the Mac address book program, I found that it is easy to pull email addresses directly from the W&L address book without going through GroupWise or the W&L web site's directory search.

Simply go to options in the address book, and add an LDAP server with the following:

addressbook.wlu.edu

No need for a password etc, at least when using from on campus.
